Slides adapted from Coralie Busse-Grawitz

A typical exercise session

Brief presentation

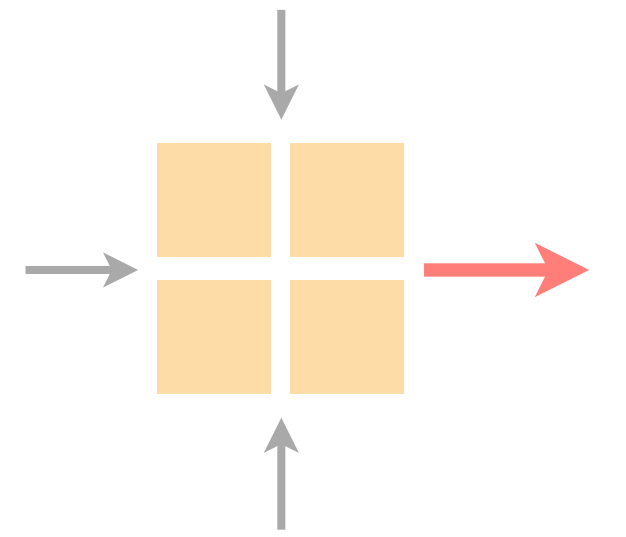

elaborate on topics/questions

Time to solve the exercise

we are also available on Element/mail

Communication Networks

Spring 2025

Important network tools

Time to solve the exercise

Important network tools

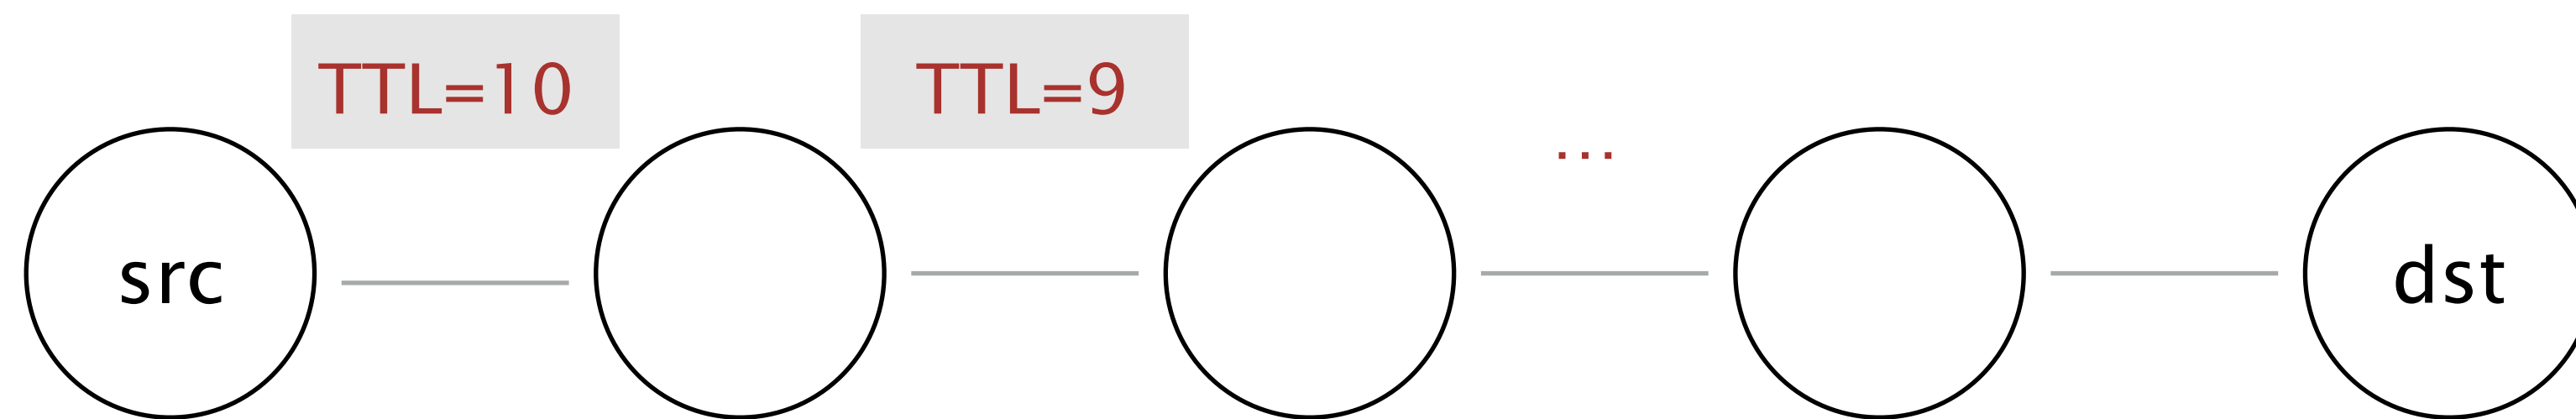

Is a destination reachable? **ping**

What is the path to the dst? **tracert**

What is the IP of a domain? **dig**

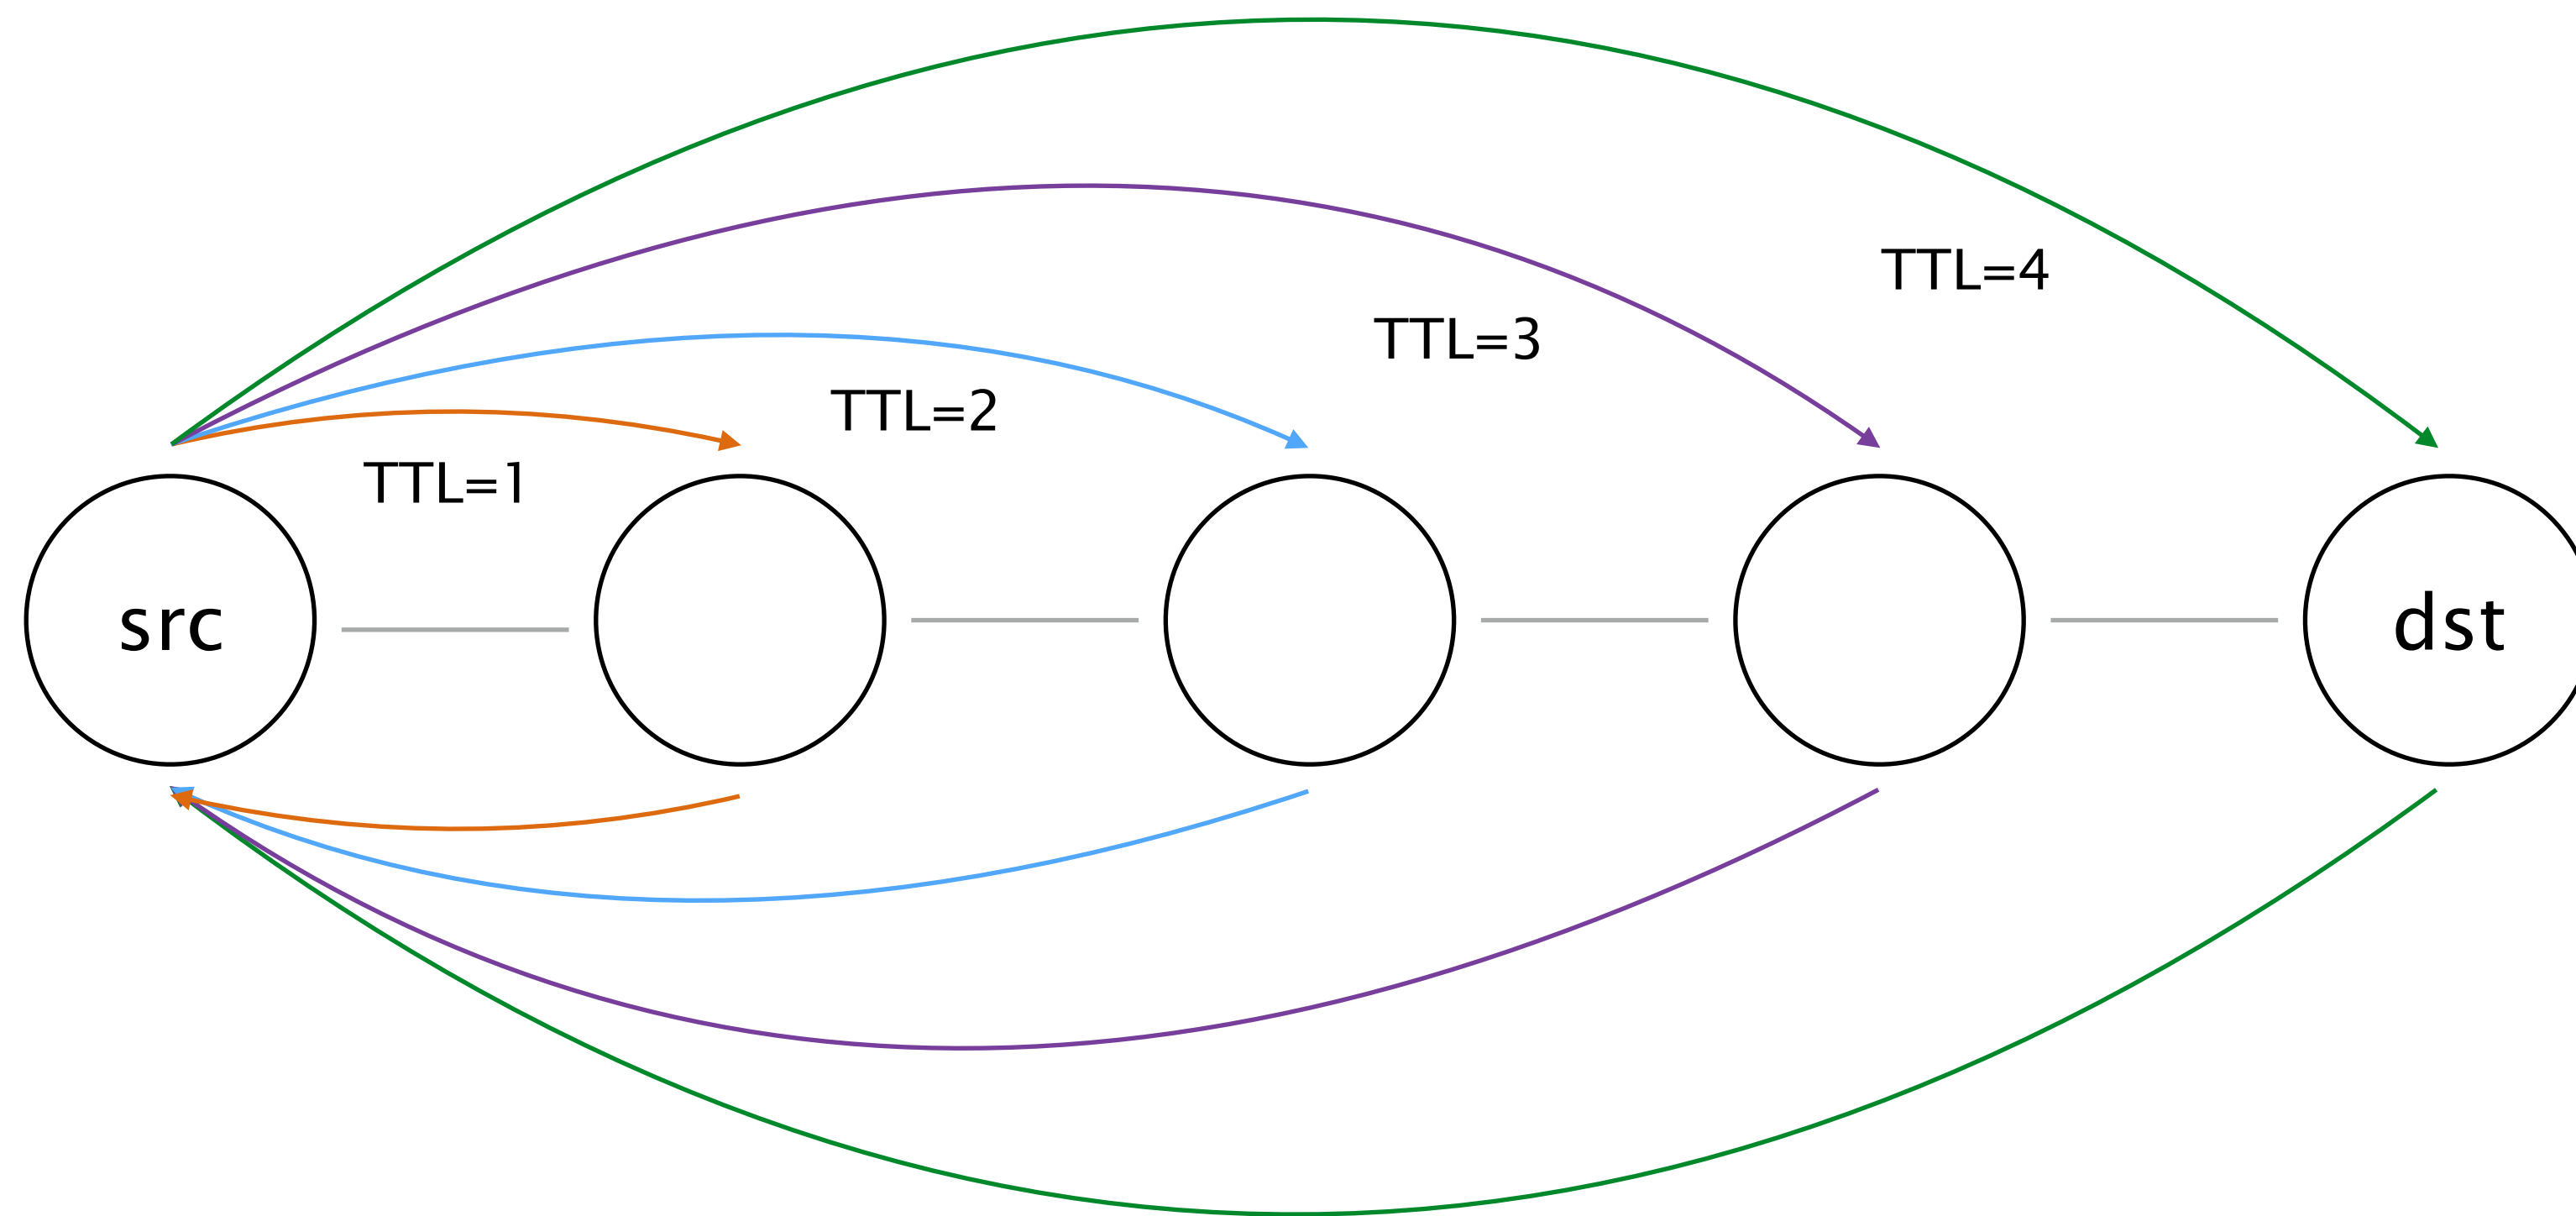

What packets does a device send? **Wireshark**

The Time-To-Live (TTL) field
decreases by 1 per hop

traceroute finds the path

thanks to expiring TTLs of multiple packets

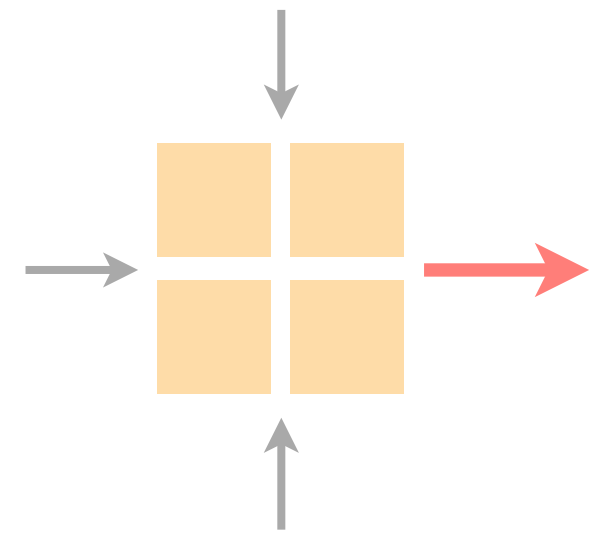

traceroute's method
has some “issues”

non-answering devices

multiple possible parallel paths
